GDG Algiers ER Task 01: Event Partnership Plan

Oct 21, 2026 · @ch

Event summary

DevFest Algiers is GDG Algiers' flagship annual developer festival. This plan covers the 2026 edition, assumed to run in four weeks (about 18 to 20 November, the dates of the 2021 edition; the organizing team must confirm).

Item	Detail
What it is	Conferences, workshops and a three-day hackathon, run together with Women Techmakers (WTM) Algiers.
Track record	11 consecutive editions. The event page lists 2K+ attendees, 20+ workshops and 700+ hackathon participants.
Audience	Mostly students and early-career developers, plus professionals and women in tech through WTM.
Entry	Free. The 2021 edition's site promised it would always stay free, so there is no ticket revenue and partners fund the event.
Reach	Facebook 20k+, Instagram 20k+, LinkedIn 11k+, Discord 4k+, X 2.9k+ followers (ER resource pack).
Past partners	2021: InstaDeep, Altius Services, LG Algiers, Weights & Biases, GoMyCode, DZhoster. The sponsors page now shows LG, GitHub, Google, DigitalOcean and DZSecurity.

Why this event. It is the chapter's most established event, so partners can check its record. The hackathon and talks give partners something concrete to want: student talent, challenges and visibility. Past partners give warm leads, which matters with four weeks left. Free entry makes sponsor funding the main risk, so External Relations work decides whether it happens well.

To confirm with the team: final dates, venue (ESI campus is the home base; 2021 used a partner's offices plus online), expected attendance, hackathon theme and total budget.

Prioritized needs

The event has seven needs that matter, ranked by what breaks the event if missing and how long it takes to secure. Venue and logistics are lower because ESI is the home campus and printing can wait; I did not chase every category in the ER pack, as its own guidance says to start from real priorities.

Rank	Need	Why it sits here	Realistic target
1	Catering (food, drinks, coffee breaks)	Three days of a free event; the largest cash cost and the first thing attendees notice.	In-kind food and drinks, or cash earmarked for it
2	Financial (core budget)	Pays for speaker travel, printing, badges, transport and anything in-kind cannot cover.	One Gold and one to two Silver packages from the offer sheet (600,000 DA and 400,000 DA each)
3	Speakers	Content is the reason people come; practitioners also make the event attractive to partners.	3 to 5 industry speakers from partner companies
4	Prizes (hardware, vouchers, training)	The hackathon is the main draw for the 700+ participant community.	Hardware or vouchers for the top three teams, plus training scholarships
5	Equipment (screens, microphones, Wi-Fi, hackathon workspace)	Needed from day one but partly covered by the host campus.	Loan or donation of screens and audio
6	Visibility and recruitment	A need for partners more than for us, so it is what we offer; it also gives attendees real internship paths.	Opt-in job and internship board, partner talks
7	Logistics and community collaboration	Badges, printing and other communities help but are easy to adjust late.	Absorbed by cash budget; invite other GDG and student clubs

Timeline logic. Written commitments are needed by about 10 November to leave time for printing and fulfilment, so ranks 1 to 3 are contacted first.

Prospects

Twelve prospects, each tied to a need and to evidence of what the company already does. "Warm" means GDG Algiers already has a relationship.

#	Prospect	Why they fit	Needs it can cover	Link
1	InstaDeep	Backed the 2021 DevFest with speakers, a hackathon-winner internship interview and AI training for winners.	Speakers, prizes, recruitment	Warm
2	Djezzy	Ran a national hackathon in November 2025 and a student hackathon at USTHB, and runs a student programme.	Cash, prizes, recruitment, visibility	Cold
3	Ooredoo Algérie	Sponsors tech events and young-entrepreneur programmes (tStart, iStart, Oobarmijoo).	Cash, visibility	Cold
4	Yassir	Algiers-based super app described as the Maghreb's largest tech employer; its recruiter role includes attending tech meetups.	Recruitment, speakers, prizes	Cold
5	Condor Electronics	Algerian electronics maker with a Start-up Academy run with universities.	Hardware prizes, equipment, cash	Cold
6	Altius Services	Hosted DevFest 2021 at its offices.	Venue, equipment	Warm
7	LG Algiers	Backed the 2021 edition and appears on the current sponsors page.	Screens, prizes	Warm
8	GoMyCode	2021 sponsor; a large tech training community in Africa.	Training scholarships, speakers	Warm

#	Prospect	Why they fit	Needs it can cover	Link
9	Hamoud Boualem	Algerian beverage brand; not researched in this pass, chosen from general knowledge for catering.	Drinks, catering	Cold, unchecked
10	Huawei Algeria	Runs the ICT Academy and the annual ICT Competition with Algerian universities.	Equipment, prizes, speakers	Cold, conflict check needed
11	Algerian Startups Fund	Co-organized a hackathon with Djezzy in 2023; connects teams to the startup ecosystem.	Winner follow-up, community	Cold
12	DigitalOcean	Listed on the GDG Algiers sponsors page; cloud credits suit hackathon teams.	Prizes (credits)	Warm

Prospect ranking

InstaDeep and Djezzy lead on a weighted score because they combine strong need fit with a proven interest in student hackathons. Each criterion is scored 1 to 5 (5 is best; for risk, 5 means lowest risk): need fit counts 40%, chance of closing within four weeks 30%, mutual value 15% and low risk 15%. The scores are my judgement from the evidence above and should be revised after the first replies.

Rank	Prospect	Need fit	Closing chance	Mutual value	Low risk	Score	Package to propose
1	InstaDeep	4	4	5	5	4.30	Silver-level, in-kind: speakers, internship track, training prizes
2	Djezzy	5	3	5	4	4.25	Platinum (800,000 DA); fallback Gold
3	Ooredoo Algérie	5	3	4	4	4.10	Gold (600,000 DA); fallback Silver
4	Yassir	4	3	5	5	4.00	Gold or Silver, centred on recruitment and a talk

Rank	Prospect	Need fit	Closing chance	Mutual value	Low risk	Score	Package to propose
5	Condor Electronics	4	3	4	4	3.70	Silver, cash or devices as prizes
5	Altius Services	4	3	3	5	3.70	In-kind venue and equipment, Bronze visibility
7	LG Algiers	3	4	3	5	3.60	In-kind screens, Bronze or Silver
7	GoMyCode	3	4	4	4	3.60	Training scholarships as prizes, Bronze
9	Hamoud Boualem	4	3	3	4	3.55	In-kind drinks, Bronze
10	Huawei Algeria	4	3	4	2	3.40	Silver in-kind, only after the conflict check
11	Algerian Startups Fund	2	4	3	5	3.20	Community partner, no cash
11	DigitalOcean	2	4	3	5	3.20	Cloud credits as hackathon prizes

Reasoning on key calls.

- **Djezzy over Ooredoo for the top slot.** Djezzy has run student hackathons directly, so a DevFest hackathon matches what it already funds. Ooredoo is a strong cash prospect but its record is broader entrepreneurship, so it ranks just below.
- **The two telecoms compete.** Only one is offered the top package; the other is offered the next tier down. I do not promise either exclusivity.
- **Huawei carries the most risk.** It competes with Google's developer platforms, so I would ask the GDG chapter leads whether the Google programme allows its sponsorship before pitching.
- **Warm partners rank mid-table on purpose.** Their closing chance is high but their need fit is narrower (screens, credits, scholarships), so they fill gaps rather than carry the budget.
- **Hamoud Boualem is unchecked.** I have not verified its sponsorship activity; it stays on the list only because catering is rank 1 and needs an in-kind option.

Contact strategy

Warm partners are contacted first and directly by the chapter; cold prospects get a tailored email to the right department, then a call within a few days. Everything starts in week 1 because large companies approve slowly and written commitments are needed by about 10 November.

Who we contact and what we ask

Contact names must be confirmed from official channels and LinkedIn; I did not guess individuals.

Prospect	Who and how	The ask	What we offer
InstaDeep	The people who handled the 2021 edition, by direct message or email	Two speakers, an internship interview track, training for winning teams	A speaking slot, a hackathon challenge, logo, a post-event report
Djezzy	Its university and student programme or sponsoring team, email then a 20-minute call	Platinum package; fallback Gold	Title visibility, a 15-minute talk, a challenge, access to winning teams
Ooredoo Algérie	Its events and sponsoring team, email then a call	Gold package; fallback Silver	A 10-minute talk, social visibility, a challenge
Yassir	Technical recruiting or employer-brand team	A recruitment-focused Silver or Gold package	A talk, an opt-in CV pool, a challenge, a recruitment space
Condor Electronics	Marketing or its Start-up Academy team	Silver, or devices as hackathon prizes	Logo on posters and flyers, product display space
Warm partners (Altius, LG, GoMyCode, DigitalOcean, GitHub, DZSecurity)	Chapter lead message, with a thank-you and one specific ask each	Venue, screens, scholarships, credits, swag	Bronze or Silver visibility

Four-week timeline

Week	Actions	Milestone
1 (21 to 27 Oct)	Confirm dates, venue and budget; prepare a one-page deck and the tier sheet; contact all warm partners and Djezzy, Ooredoo and Yassir	First wave sent

Week	Actions	Milestone
2 (28 Oct to 3 Nov)	Follow up by call after 3 to 5 days of silence; hold meetings; contact Condor, Hamoud Boualem and Algerian Startups Fund; Huawei only after the conflict check	Two or more meetings held
3 (4 to 10 Nov)	Negotiate and close; send written agreements; collect logos and content	Commitments signed by 10 Nov
4 (11 to 17 Nov)	Confirm in-kind deliveries, brief partner speakers, finalize visibility and run-of-show	All deliverables confirmed
Event and after	Run the event, then send each partner a short impact report within two weeks	Report sent

The pitch

Each message opens with something the company already does (for Djezzy, its student hackathons), then states what DevFest is in numbers, asks for one specific thing tied to a ranked need, names what they get, and ends with a 20-minute call. The attachment is the one-page deck, not the full package.

Negotiation limits

- **Must-haves:** catering, core cash and speakers. **What partners want:** talent access, visibility and goodwill with students. **Negotiable:** package mix, talk length, challenge theme.
- **Minimum acceptable deal:** Bronze (200,000 DA) or equivalent in-kind value, and at least two funded packages overall for the event to run as planned.
- **Not negotiable:** free entry for attendees, no sharing of participant data without opt-in, and GDG control of talk quality and hackathon judging.
- **Check before saying yes:** the benefit is possible (one title sponsor, a capped number of hackathon challenges), not already promised, no clash with another deal, and the team can deliver it. Document contribution, deliverables, visibility, speaking, booths, content requirements, deadlines and any exclusivity in writing.
